

What subjects will I study? What will I be doing in my lessons?

Frequently Asked Questions

Computing

Computers are everywhere! We live in a world that runs on computers and the technology is getting smarter. Use of technology is something that we do every day and it is hard to imagine a life without it. This is not just the personal computers (PCs) that sit on a desktop, but includes smart phones, games consoles, smart TVs, in-car entertainment and navigation, smart lights and doorbells. Computing can be hands on, it can breed resilience. It develops problem solving skills and it opens a student's eyes to the digital world, this can engage, enthuse and cause a real spark in students.

Welcome to the Computing Faculty and my name is Miss Jones. I am Head of Subject for Computing.

When you arrive at Shoeburyness High School you will be given your own username and password to access the school computers. You will have a school email address and access to our student online portal, Edulink which allows you to manage your homework tasks and communicate with your teachers.

At school we study different topics of Computing. You will have looked at some of these areas before and used different technology at home and at school. The areas we cover include spreadsheet modelling, Scratch and Python programming, e-safety, website development and many more. You will learn how to use the technology and school programs to help you progress in your digital journey at Shoeburyness High School.

Computing Team

A warm welcome from the Computing staff:

- Miss Harris
- Mrs Hinds
- Mrs Salinas

Useful links/Fun activities

Using a computer regularly can help you practice your computing skills. Using these websites/links can help you recap some of these skills that you have used in school and have some fun along the way!

- [Scratch](#)
- [Hour of Code](#)
- [Code Combat](#)

Enjoy and we look forward to meeting you in September.

Miss Jones
